

CODE A FRIEND

Robots and computers use their own special language called code.
Code is made from words and numbers which tell robots what to do.

INTRODUCTION

These are called coding blocks.
Fill in the blank sections using the options listed. Once you have filled these in, take our fun treasure map challenge yourself below.

MOVE	▼ CHOOSE ONE Forwards backwards	▼ HOW MANY	STEPS
	<input type="text"/>	<input type="text"/>	
TURN	▼ CHOOSE ONE 1/4 1/2 3/4 Full	▼ CHOOSE ONE Left Right	TO THE
	<input type="text"/> turn	<input type="text"/>	

FIND THE TREASURE - CODING CHALLENGE

Using the coding blocks, plot a route from the start point on the map to the buried treasure marked 'X' and avoiding the obstacles.
Use the coding example terms from above to help you.
Once you complete this challenge, create your own on the back of the paper and test it on your friends!
